PROFESSIONAL SUMMARY

Senior Software Engineer with 5+ years of experience building scalable backend systems, leading development teams, and delivering production-grade applications. Specialized in Python/Django ecosystem with expertise in FastAPI, cloud infrastructure (AWS, GCP), and AI/ML. Employee of the Quarter for leading two live products with growing user bases. Experienced mentor and university lecturer.

TECHNICAL SKILLS

Languages: Python, JavaScript/NodeJS, Go, Java **Frontend:** React, Vanilla JavaScript
Backend: Django, Django REST Framework (DRF), Django Ninja, FastAPI, NestJS, Celery **Practices:** Agile, Test-Driven Development (TDD), Continuous Integration/Continuous Deployment (CI/CD)
Databases: PostgreSQL, MySQL, MongoDB, Redis, ElasticSearch
Cloud/DevOps: Amazon Web Services (AWS), Google Cloud Platform (GCP), Docker, Kubernetes, AWS CDK, GitHub Actions, Apache Kafka
AI/ML: Pandas, Scikit-learn, Deep Learning, Large Language Models (LLM), OpenAI, YOLO, FaceNet, Google Colab, Vertex AI

PROFESSIONAL EXPERIENCE

Brain Station 23 PLC — Dhaka, Bangladesh
Senior Software Engineer Jul 2024 — Present
Software Engineer Jan 2024 — Jun 2024
Associate Software Engineer May 2022 — Dec 2023

- Architected and led backend development for 2 production platforms (BL Power, BL Wallet), earning Employee of the Quarter in 2024
- Reduced database storage by 93% (460GB to 30GB) by designing and executing a migration of 40M+ records in under 1 hour
- Optimized file upload pipeline from 6 hours to 15 minutes, improving operational efficiency by 96%
- Built a real-time notification engine processing 100K+ events daily using Kafka and CleverTap integration
- Designed an AI-powered content search platform with OpenAI enrichment, reducing content onboarding time by 70%
- Delivered 6+ projects across fintech, telecom, and SaaS domains, contributing to both backend architecture and cross-team collaboration

Turing — Remote (Part-time)
Software Engineer, Python Mar 2024 — Dec 2024

- Evaluated and ranked AI-generated code across 500+ coding challenges, directly contributing to LLM training data quality
- Solved complex algorithmic and system design problems to benchmark and improve code generation accuracy

BRAC University — Dhaka, Bangladesh
Lecturer, Contractual Sep 2023 — Jan 2024

- Taught 60+ students as industry expert in CSE department, bridging academic curriculum with real-world engineering practices
- Mentored undergraduates as Student Tutor for 1 year (Jun 2021 — May 2022), improving course pass rates

Makebell — Remote (Hong Kong, China)
Software Engineer Sep 2021 — Apr 2022

- Built backend for a TikTok-style e-learning app with auto-captioning, Speech-to-Text (STT), and Text-to-Speech (TTS) using GCP Speech APIs
- Integrated Elasticsearch for content discovery, enabling sub-second search across 10K+ video entries

Tickets4Travel — Dhaka, Bangladesh
Junior Software Engineer Apr 2021 — Sep 2021

- Designed ridesharing backend with PostGIS geometric queries and a custom ride-matching algorithm, reducing avg match time
- Implemented real-time driver-rider communication using Django Channels WebSocket connections

Digiden — Dhaka, Bangladesh
Intern Software Engineer Nov 2020 — Apr 2021

- Developed fullstack investment and inventory management system enabling direct investor ownership and automated profit-share distribution

KEY PROJECTS

Searchify | Full Stack Developer | Live
Dynamic content search and onboarding platform for Banglalink with AI-powered content enrichment. Built a React CMS for non-technical content managers and an intelligent search API.
FastAPI, Elasticsearch, OpenAI, React, Docker

BL Power | Backend Lead | Live
Retailer airtime sales platform serving thousands of retailers with campaign management, commission tracking, and real-time offer distribution. Integrated with Paywall Plus, IAM, BL Wallet, and SMS services.
DRF, MySQL, RabbitMQ, Redis, Docker, Nginx

BL Wallet | Backend Lead | Live
Centralized, fault-tolerant wallet service handling financial transactions across multiple Banglalink platforms with master-slave replication for high availability.
Django Ninja, MySQL (Master-Slave), RabbitMQ, Celery

JIC — Job Interview Copilot | Backend Developer | Live
AI-assisted interview preparation platform with scheduled task processing and cloud deployment. Built async job pipelines for interview simulation workflows.
Django, Celery, AWS (EC2, S3, RDS), PostgreSQL

AmarCar | Backend Developer
Ridesharing platform with geometric location matching using PostGIS, custom ride-assignment algorithm, and real-time driver-rider communication via WebSockets.
DRF, Django Channels, PostGIS, AWS

Ricciwawa | Backend Developer
TikTok-style e-learning social media app with auto-captioning, speech-to-text, and text-to-speech. Deployed on Google Cloud with App Engine and Cloud SQL.
DRF, GCP (GAE, Cloud SQL, Speech API), Elasticsearch

IAB Portal | Full Stack Developer
Membership and event management portal for the Institute of Architects, Bangladesh with Odoo ERP integration and AmarPay payment gateway.
Django Ninja, PostgreSQL, GitHub Actions CI/CD, Odoo

Smart Home Assistant for Alzheimer's Care | Published
BSc thesis — ambient assisted living system using real-time object detection and face recognition to assist Alzheimer's patients. Created custom datasets for objects absent from ImageNet.
YOLOv4/v7, FaceNet, Deep Learning, Python

EDUCATION

BRAC University — Dhaka, Bangladesh
BSc in Computer Science & Engineering 2018 — 2022

- CGPA: 3.92 / 4.00 | Highest Distinction | VC's List | Dean's List | Merit-based Scholarship (Throughout)
- Thesis: "An Ambient Assisted Living System for Alzheimer's Patients" | Student Tutor (Jun 2021 — May 2022)

CERTIFICATIONS & MENTORSHIP

CERTIFICATIONS

- **ACMP 4.0** — IBA, Dhaka University (2025)
- **AWS ML Foundations** — Udacity (2022)
- **ML on Google Cloud** — Coursera (2022)
- **Managing Jira Projects** — Atlassian (2023)

MENTORSHIP & TEACHING

- Mentored multiple trainee batches at Brain Station 23
- Mentor at Learnathon 3.0
- Guest Lecturer at BRAC University (CSE Dept.)
